# CSC173 Formal Models and Computation
# Project 4 Submission Form

Complete this form using a PDF viewer/reader, save it, and submit it with your code on BlackBoard.

Last name: Zhijie First name: Wang NetID: zwang179

File containing your `main` function: main.c

Did you use "`-std=c99 -Wall -Werror`"?

Check one: Yes ☑ No ☐ I don't know ☐

Does your code have a clean report from `valgrind`?

Check one: Yes ☑ No ☐ I don't know ☐

**Part 1**

Data structures for relations (structs, hashtables, etc.):

struct SNOP_TUPLE, SNOP_HASHTABLE, struct PSH_TUPLE, PSH_HASHTAE

Implementation of basic single-relation operations (*insert*, *delete*, and *lookup*):

SNOP_insert, SNOP_insert2, SNOP_delete, SNOP_lookup, PSH_insert, PSH_in

Required operations:

SNOP_TUPLE_print, SNOP_HASHTABLE_print, SNOP_generate, PSH_TUPLE_

*Continues on next page. . .*

**Part 2**

Function for first required query (name and filename):

firstQuery(SNOP_HASHTABLE snop_table, PSH_HASHTABLE psh_table), query

Function for second required query (name and filename):

secondQuery(PDA_HASHTABLE pda_table, PM_HASHTABLE pm_table, SNOP

**Part 3**

Implementation of Relational Algebra operations:

relational-algebra.h, relational-algebra.c

Code to demonstrate these on the required examples:

allOperations(pm_table, pda_table)

Put any other comments and helpful descriptions in your writeup.
